To Whom it May Concern,

TreeTop Adventures is a Challenge Course that is licensed and inspected annually by the Massachusetts Department of Public Safety. In addition, TreeTop Adventures is a member of the leading national Association of Challenge Course Technology (ACCT) who performs a thorough annual inspection of our entire course, equipment and documentation.

TreeTop Adventures uses an “always locked on” state-of-the-art dual carabineer-lanyard system (SSB- Smart Safe Belay System) made by the German Company Bornack. Our harnesses are state-of-the-art, third generation, full body five-point harnesses. This system and our course allow over 200 climbers to climb safely and autonomously. We staff our park in a zone coverage format to ensure climbers have the support and assistance they need while navigating our 10 trails.

Our staff goes through a 40-hour training that culminates in both a written and practical exam. Our General Manager & Course Operations supervisor have undergone and passed an additional 1-week trainer certification program by a nationally recognized training program, Aerial Adventure Academy, one arm of Outdoor Ventures LLC and are thereby certified to train our staff. Our staff is required to be CPR & First Aid certified and we have an AED on site in our mobile office trailer.

Should your program need any additional information besides this letter, our Current License to Operate, Our Certificate of Insurance, and our W-9, please contact me at soglia@tree-topadventures.com

Sincerely,

Sherill Oglia

Group Sales & Marketing Manager, TreeTop Adventures
